Every moment of our lives, every part of our bodies, is wearing out and is being built up anew. This work is accomplished by the blood. The blood, if pure, makes the entire circuit of the body every seven minutes. But if it becomes weak or vitiated and does not perform its work properly the system is actually poisoned by the worn-out matter clogging the vital organs instead of leaving the body. DIRECTIONS FOR USE.

Cut up fine and dissolve one half bar in half gallon of hot water. Pour half this dissolved coap into a tub with just sufficient hot water to cover a boiler full of clothes. Then put the cluthes in to soak, rubbing plenty of soap in the most soiled parts. Be sure that the soaking water is hot; soak the clothes half an hour; stir them occasionally so that they may get the full benefit of the hot suds; pour the remainder of the dissolved soap into the boiler, adding sufficient water to cover the clothes; wring them lightly out of the suds. Soap the staff ned spots and place loosely in the boiler; boil to to so minutes, rinse well, blue and hang rodes to not crowd the boiler too full. The same boiling water may be used for furnisholding by adding a little soap to each boiler full of clothes. Fannels and priots should not be boiled, only a little rubbing required after soaking. This soap will cleanse clothing thoroughly as any other without the use of the boiler. We prefer and recommend the billioprocess as in itself a cleansing process, saving labor, the wear of the wash-board, and being a process as in itself a cleansing process, saving labor, the wear of the wash-board, and being a best disinfectent known, it is easier to boil the dirt ont thus to ryce out.
